***Do you know what the fragrance
of freedom smells like?***

The process of creating a new perfume involves many stages. But it all starts with an inspiration, an impression, a thought or a feeling that we want to reflect in a fragrance. Surely everyone has at least once experienced firsthand what power they hold. They can give us energy, help us become more confident, or recall a person, place or event that played an important role in our lives.

And that's what's amazing about them!

That's why this year, we decided to expand our perfume range with more wonderful compositions. Two new additions to the

Precious collection are fragrant expressions of freedom and vitality. We have also enlarged our classic collection of perfumes for her and for him with several new, unusual fragrances.

You are welcome to discover them!

COLLAGEN CARE

As early as between the ages of 25 and 30, the level of collagen in the skin begins to decline – more and more collagen cells die, and new ones appear more slowly. After the age of 60, its production virtually stops. That's why we have created collagen cosmetics and dietary supplements that stimulate its natural regeneration and help significantly slow down the aging process.

COLLAGEN PRO

Q What else we're proud of: studies* have shown that after 4 weeks of using our serum, skin elasticity increased by an average of 15%, and shallow and medium wrinkles decreased and became less visible. 100% of respondents confirmed that the cosmetic makes the skin regain its radiance and youthful appearance.

*On the basis of independent application-use and apparatus studies conducted on a group of 25 people.

Let them develop their fullness, give yourself time to experience all the richness of the ingredients. In the first few minutes a delicate, vibrant head note bursts

out. Then the heart note is revealed to us. At the end we explore the note of depth. Remember that you do not have to choose only one fragrance, you can choose several different ones for different occasions.
